EDUCATION

Queen's University

Bachelor of Applied Science, Major in Computer Engineering (3.9 GPA)

Kingston, ON

Sep. 2025 – Apr. 2030 (*Expected*)

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS

Frameworks: React, Node.js, Vue.js, .NET, WordPress

Databases & Services: MySQL, Firebase, SQLite, MongoDB

Cloud & DevOps: Docker, Azure, Git, GitHub

Misc: PowerBI

EXPERIENCE

Lighthouse Medical Imaging

Contract Software Developer

May 2026 – Aug. 2026

Markham, ON

- Developed **Python**-based automation tools using **PACS** systems and the **DCMTK** toolkit to automate medical imaging workflows, reducing processing time per patient from **5–10 minutes** to under **1 minute**.
- Engineered solutions to read, write, and process **DICOM** and PDF records, automatically extracting patient data and populating standardized reporting templates with minimal manual intervention.
- Built web automation workflows using **Playwright** to streamline immigration-related submission processes, improving efficiency, accuracy, and throughput across administrative operations.

NED Alumni Canada

Website Developer

Sep. 2025 – Present

Markham, ON

- Spearheaded continuous website enhancements using **WordPress**, implementing custom features and scalable pages to support **organizational growth**.
- Diagnosed and resolved **critical bugs**, optimizing server-side performance to maintain **99.9%** uptime and prevent system instability.
- Analyzed **traffic metrics** to coordinate scheduled maintenance and iterative updates, ensuring a seamless user experience.

telMAX

Software Engineer Intern

Jan. 2025 – Apr. 2025

Stouffville, ON

- Developed a **Java**-based **CRM** system with a **4-member** team using **Firebase** for secure user authentication and real-time database synchronization.
- Built a custom desktop UI with **Java Swing**, implementing specialized components like Heapsort for efficient data organization and GridBagUtil for responsive layouts.
- Managed full project lifecycle using **Gradle** for build automation and **Git/GitHub** for version control and collaborative development.

PROJECTS

Budgeter | *React, Firebase, Git, GitHub*

Sep. 2025 – Present

- Developed a **high-performance** web application using **React** and **Rsbuild** to provide real-time expense tracking and budget management.
- Engineered a scalable data layer by implementing local state management and **JSON**-based storage, with active development of a **Firebase** backend for cloud synchronization and persistent user authentication.
- Optimized the development lifecycle by configuring **ESLint**, **Prettier**, and **Biome** for strict code quality, alongside a custom **Vite**-powered build pipeline to ensure rapid deployment and high UI responsiveness.

HAABS | *Python, PyQt*

Feb. 2024

- Developed a comprehensive healthcare management application in **Python**, utilizing **JSON**-based data persistence to manage appointments, patient symptoms, and hospital records.
- Engineered a customized user interface by implementing and styling modular **Qt** Style Sheets (QSS) (e.g., symptoms.qss, view.qss) to ensure a professional and intuitive user experience.
- Optimized data handling and location services by integrating a **CSV**-based postal code mapping system, enabling efficient geographic sorting and patient data validation.
